

After a slight laminitis Felicia (Warmblood, about 8 years) couldn't even walk on her soft pasture and her hooves looked a mess.

At the beginning we glued on our turfcords every 2-3 weeks. After hoof situation has improved the interval got longer so that the last intervall was 6 weeks.

With our turfcord she now can be ridden again on soft trails.

19.mai.2023

flairing walls - cracks - stretched white line

17.07.2023

- cracks are growing down
- white line regenerating
